

Optimized Independent Third-Party Tested AVM Cascade

ValuSTREAM™ is the complete automated valuation model (AVM) cascade solution, tailored to exceed the highest standards of quality and performance. Backed by rigorous quarterly, independent third-party testing *Powered by CoreLogic® OptiVal*, it leverages both purchase and non-purchase data to prioritize AVM performance. ValuSTREAM redefines accuracy and coverage, setting a new benchmark for reliability in property valuations.

By leveraging the industry's top-performing AVMs, including VeroVALUE®, ValuSTREAM gives users the confidence and flexibility to focus on maximum accuracy, highest coverage, or balanced results, enabling smarter, data-driven property valuation decisions—with the supporting testing data to back it up.

AVM Valuation with Precision and Flexibility

Independent Verification

Tested quarterly by independent third-party firms to ensure optimal accuracy and reliability.

Tailored Flexibility

Customize your cascade order to focus on accuracy, coverage, or a balanced approach.

Hassle-Free Setup

Pre-configured and ready to order—no complex setup required.

Geographic Precision

Cascade order is refined at the county level for location-specific accuracy.

Compliance Ready

Meets AVM guidelines for the highest standards of diligence.

Select the ValuSTREAM Option for Your Needs

Accuracy Focused

Maximize valuation accuracy with strong hit rates and broad coverage.

Coverage Focused

Identify markets deserving attention for opportunities or risks, allowing proactive portfolio management.

Balanced

Harness the power of data-driven insights to lower costs and fortify risk mitigation strategies.

Why ValuSTREAM is the Smart Choice

Strategic Weighting

Weighting factors include hit rate, P10 accuracy, the percentage of large outliers, and the correlation of valuations to confidence score.

Quarterly Cascade Updates

Performance data is refreshed regularly to adapt to market changes.

Purchase & Non-Purchase Testing

Powered by CoreLogic® OptiVal, utilizing both purchase and non-purchase testing data for rigorous performance assessment.

AVM Flexibility

Customizable cascade rules for weightings across geographies.

Superior Accuracy

AVM cascades consistently outperform single AVMs.
